

JULY NOTICES FURNISH FEATURE IN COTTON

Tenders of About 50,000 Bales Accepted Without Causing Decline.

WEEKLY FIGURES NEUTRAL

Movement Normal, but Visible Supply Shows Another Big Decrease.

There was very little doing in cotton yesterday and about the only feature of trading came from the notices of tenders which were estimated at about 50,000 bales. An effort was made to make it appear that there was some feeling over the July situation and rumors were floating around to the effect that buyers had developed between two of the larger spot firms over the control of the New York stock. Other reports were equally positive in stating that these same interests were working in harmony. At any rate the tenders had no depressing effect on the market and the notices were taken care of after they had circulated among the commission houses and shaken out the outside longs as usual.

The weather continues favorable, with above normal temperatures in the east, belt and fair weather in the west. Reports from Arkansas are not altogether satisfactory, but those from Texas and Oklahoma are about as optimistic as any that have appeared in recent years. It is stated that central Texas could go without rain for three weeks, and no injury would result. A local commission house issued a report placing the condition at \$2.60, thus indicating an improvement of a little more than 4 points during June.

Advices from the dry goods district indicate that there has been some slowing up in trade, but this is believed to be only a temporary dull, and the momentum of the improvement in the last few months appears not believed to have lost its momentum.

The week end figures were without incidence. The net total was 40,000, against 37,000 last year, total for the season 15,322,111, against 11,665,647 last year. Interior stocks are 147,973, against 129,281 last year. The New York Cotton Exchange made spinners' takings 167,000 bales for the week, against exactly the same amount last year. The visibly supply of American cotton showed a decrease for the week of 136,000 bales, and is now 2,210,000, against 1,423,000 last year.

Futures closed steady, with prices 1 to 4 points higher. Estimated sales 175,000 bales. Prices as follows:
